Important Information about the ATUS Data Dictionary (ATUS-CPS)

Introduction

The American Time Use Survey (ATUS) is sponsored by the Bureau of Labor Statistics and conducted by the U.S. Census Bureau. The purpose of this document is to provide information about the variables available on the 2003-18 ATUS-CPS file. Variables that appear on the 2003-18 Activity Summary file also are identified.

The ATUS-CPS file contains information collected in the Current Population Survey (CPS) interviews about persons selected to participate in the ATUS and members of their households. The file has one record for each household member. **The CPS interviews were conducted two to five months prior to the ATUS interview. For this reason, some of the information on the ATUS-CPS file was out of date at the time of the ATUS interview. When possible, it is best to use variables collected in ATUS rather than their CPS counterparts.**

This data dictionary lists all the variables available on the 2003-18 ATUS-CPS file and their valid values. It also provides directions on how to read the data dictionary.

Three additional data dictionaries describe other ATUS files:

- **ATUS Interview Data Dictionary:** Describes the variables that were collected and assigned in the ATUS interview. The variables described are available on the Roster file, Activity file, Activity Summary file, Who file, Respondent file and Eldercare Roster file (introduced in 2011). There is one multi-year Interview Data Dictionary describing variables available on the 2003-18 Roster, Activity, Activity Summary, Who, Respondent, and Eldercare Roster (2011-2018) files. This dictionary is available for both multi-year and single-year ATUS data files.
- **Survey Methodology Data Dictionary:** Describes the variables available on the Case History file and the Call History file. This data dictionary is available for single-year Case History and Call History files and there is a multi-year Survey Methodology Data Dictionary describing the variables available on the 2005-18 Case History file. There is no multi-year file for the Call History files.
- **Trips Data Dictionary:** Starting in 2011, the trips questions were replaced by the eldercare questions. The data dictionary describes the variables on the Trips files, which are available for the years, 2005-10. This data dictionary is only available for single-year Trips files because there are no multi-year Trips files.

These additional data dictionaries are available on the ATUS Web site at www.bls.gov/tus/dictionaries.htm.

Naming Conventions and Definitions

Variables on the ATUS-CPS file are named according to ATUS and CPS rules:

- The first character of the variable name identifies the level of the variable (whether it refers to a person, a household, a household location, or an ATUS variable)
- The second character of the variable name identifies the variable type (whether it is unedited, edited, a recode, an allocation flag, or topcoded)
- The remaining characters consist of a descriptive name

The table below lists the meaning of the first character in more detail.

First Character	Level of Variable	Definition
G	CPS Geography variable	<p>Geography variables are collected in CPS and identify a household location. For example, GESTFIPS gives the FIPS state code for the location of the household.</p> <p>Geography variables have separate values for each household in the ATUS-CPS file. Thus, they are the same for each member of the household. They are only found in the ATUS-CPS file and not in any of the other ATUS files (except GTMETSTA, which is also found on the Activity Summary file).</p>
H	CPS Household variable	<p>Household variables are collected in CPS and describe a household characteristic. For example, HRNUMHOU gives the total number of persons living in the household.</p> <p>Household variables have separate values for each household in the ATUS-CPS file. Thus, they are the same for each member of the household. They are only found in the ATUS-CPS file and not in any of the other ATUS files.</p>
P	CPS Person variable	<p>Person variables are collected in CPS and describe a characteristic of a person. For example, PRTAGE gives the age of an individual.</p> <p>Person variables have separate values for each person in the ATUS-CPS file. They are only found in the ATUS-CPS file and not in any of the other ATUS files (except PEEDUCA, PTDTRACE, and PEHSPNON, which are also found on the Activity Summary file).</p>
T	ATUS variable	<p>ATUS variables ("T" for time use) are collected through ATUS interviews.</p> <p>There are only three ATUS variables in the ATUS-CPS file. Two of these are the ATUS case ID (TUCASEID) and ATUS person line number (TULINENO); these variables are used for linking the ATUS-CPS file to other ATUS files. The third variable is TRATUSR, which identifies those persons who responded to the ATUS interview.</p>

The following table gives more information regarding the second character of the variable name (note that the variables on the Activity Summary file that start with a lowercase “t” do not follow these rules).

Second character	Variable Type	Definition
U	Unedited Variable	<p>An unedited variable generally is produced by the Computer Assisted Telephone Interview (CATI) or Computer Assisted Personal Interview (CAPI) instrument and is either collected or assigned during the interview.</p> <p>“U” variables on ATUS-CPS file are either person (“P”), household (“H”), or ATUS (“T”) variables.</p>
E	Edited Variable	<p>An edited variable is one that has gone through an editing process (a process checking for consistency). Values of edited variables are almost always equal to values of the corresponding unedited variables. Data differ when a value is allocated or imputed by the processing system based on CPS allocation rules. Allocations are typically performed when the unedited variable contains a missing value or a value of "don't know" or "refused."</p> <p>An edited version of a variable exists only if that variable goes through an editing process. If there are no edits for a variable, then only an unedited version of the variable exists.</p> <p>“E” variables on the ATUS-CPS file can be either person (“P”), household (“H”), or geography (“G”) variables.</p>
R	Recode	<p>A recode is a variable calculated by the processing system from a combination of other items on the file. For example, PRMJOC1 is the major occupation code for the respondent’s main job; this is not a response to a question but rather a variable that summarizes (or “groups”) the more finely detailed occupation variable PEIO1OCD.</p> <p>Recodes on the ATUS-CPS file are either person (“P”), household (“H”), or ATUS (“T”) variables.</p>
T	Topcode Indicator	<p>These variables indicate topcoding, or the assigning of maximum values. Three topcode variables on the ATUS-CPS file are indicator flags that relate to earnings, and the others are variables that have been topcoded.</p> <p>Topcode Indicator variables on the ATUS-CPS file can be either person (“P”) variables or geography variables (“G”).</p>

Using these rules, variables can be more readily understood based on their names. For example, the variable PESEX can be broken down as follows:

- The first character “P” indicates that this is a person-level variable that was collected or created through the CPS interviews
- The second character “E” indicates that this variable went through an editing process
- The final part of the variable name, “SEX,” is descriptive

Some questions asked in the CPS interviews allow for more than one response. For such multiple entry questions, there is a separate variable for each possible response. Each variable has the same descriptive name but a different (sequential) number. For example, respondents can provide up to six answers to the question “You said you have been trying to find work – how did you go about looking?” The variable names are PULKDK1, PULKDK2, PULKDK3, etc.

Not all CPS variables are on the ATUS-CPS file. When there is an edited variable, the corresponding unedited variable is usually omitted from the files. This is typically done to protect the confidentiality of CPS or ATUS respondents as required by law. If an unedited variable is included on the files, it generally means that an edited version does not exist and that the unedited version cannot be used to identify individual respondents.

ATUS Data Files

1) 2003-18 ATUS-CPS File

This multi-year file contains most of the variables on the CPS files for households selected to participate in ATUS, whether or not there was a completed ATUS interview.

There is a record for each person in the households from which an individual was selected to participate in ATUS. However, the ATUS-CPS file represents households as they were at the time of the CPS interview (also referred to as CPS Month-In-Sample 8 data or CPS MIS-8 data). **The information on the ATUS-CPS file was collected two to five months before the ATUS interview and in some cases was out of date at the time of the ATUS survey.** Because household composition can change, the ATUS Roster file may contain more individuals for the same household. If an individual moved into the household after the CPS interview, CPS information will not be available for that person. Those persons who are no longer living in the household at the time of the ATUS interview are not included on the ATUS-CPS file.

In addition to updating the household roster, many of the CPS questions related to employment, earnings, and school enrollment are re-asked in the ATUS interview. **When possible, it is better to use a more up-to-date variable from the ATUS interview than a variable from the ATUS-CPS file.** However, some information is not re-asked in the ATUS interview, such as race and educational attainment, and is available only on the ATUS-CPS file.

A simplified example is shown below (the actual ATUS-CPS file contains many more variables). The TUCASEID identifies each ATUS case, and the TULINENO identifies each individual in the household. In the example below, TUCASEID 20180100234567 has three persons residing in the household, while TUCASEID 20180100234570 and TUCASEID 20180100234585 have one person. Each household member has the same TUCASEID and a different TULINENO.

The example includes a household variable (HEHOUSUT), a geography variable (GEREG), and two person variables (PEMARITL and PRTAGE). All members of the same household have the same value for HEHOUSUT (type of housing unit) and GEREG (region) because the variables describe a given household. Each household member has an individual value for PEMARITL (marital status) and PRTAGE (age). Some household members do not have information for all person variables. For example, TULINENO 3 of TUCASEID 20180100234567 is missing (value = -1) marital status (PEMARITL). This is because PRMARITL is not defined for individuals younger than 15.

TUCASEID	TULINENO	HEHOUSUT	GEREG	PEMARITL	PRTAGE
20180100234567	1	1	1	1	45
20180100234567	2	1	1	1	44
20180100234567	3	1	1	-1	12
20180100234570	1	6	3	3	70
20180100234585	1	1	2	4	57

2.) ATUS 2003-18 Activity Summary File

The ATUS multi-year Activity Summary file contains information about the total number of minutes each respondent spent doing each activity. The file also includes selected variables from the ATUS 2003-18 Roster, and 2003-18 ATUS-CPS files. **The Activity Summary file contains variables not described in this data dictionary. Variables beginning with a lower-case “t” correspond to specific activity codes; definitions for each activity code can be found in the 2003-18 Activity Lexicon (www.bls.gov/tus/lexiconnoex0318.pdf).**

There is one record for each ATUS respondent.

A simplified example of the ATUS Activity Summary file appears below. The variable TUCASEID is the unique identifier for each respondent and the variable TEAGE, which also appears on the ATUS Roster file, shows each respondent's age. The variable t010101 contains the total number of minutes each respondent spent doing activity 010101, "sleeping"; the variable t010102 contains the total number of minutes each respondent spent doing activity 010102, "sleeplessness."

The ATUS Activity Summary file contains more variables as well as many more records than the example below.

TUCASEID	TEAGE	t010101	t010102
20180101020210	26	480	0
20180101020211	53	430	30
20180101020212	76	457	0
20180101020213	16	600	0

Differences between ATUS-CPS File and CPS File

Most of the variables available on the CPS file also are available on the ATUS-CPS file, but there are some variables that appear on one file and not on the other, or that may have different names on the two files. Some single-year ATUS-CPS variables do not exist on the 2003-18 ATUS-CPS file. Appendices C, D, and E list all of the variables.

CPS variable information found in this document is based on the CPS data dictionaries and data files found at thedataweb.rm.census.gov/ftp/cpsftp.html. It is important to note that CPS data from other sources can have different names, different formats, or different default values for the same variables.

Valid Values

Each variable has a number of valid values or a range of valid values. For example, the variable PESEX has two valid values: 1 for male and 2 for female. The variable PRTAGE, on the other hand, has a range of valid values—any entry between 0 and 85 (except 81 through 84) is considered valid. Individual valid values or a range of valid values are listed under each variable in the data dictionary. A few variables have so many valid values that they are not included in the data dictionary; instead, they are provided in an appendix or a separate document. (References to these are included as a “Note” under the relevant variables in the data dictionary.) One example of such a variable is PEIO1ICD, which identifies the industry code of the respondent’s main job.

Many variables have the following possible valid values:

Value	Description
-1	Blank
-2	Don’t know
-3	Refused

Since so many variables have these possible values, they are not shown as valid entries for each item.

Two variables on the ATUS-CPS file do not list either valid values or a range of valid values. These are identifying variables: the primary identifier for ATUS cases (TUCASEID) and the primary identifier for CPS cases (HRHHID).

Allocation Flags

The 2003-18 ATUS-CPS file contains three allocation flags: HXFAMINC, PRWERNAL, and PRHERNAL. These flags are included due to the frequency with which earnings and income variables are imputed. The remaining allocation flags are available on the single-year ATUS-CPS files, but are not included on the 2003-18 ATUS-CPS file. For more information on these allocation flags, please see the single-year ATUS-CPS data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Edited Universe

Edited variables and recodes are defined for certain universes, and these are listed in the data dictionary. For example, PEMJNUM (number of jobs) is only defined for those who have indicated that they have more than one job. Therefore, the universe for PEMJNUM is PEMJOT = 1 (PEMJOT is the multiple job status of the individual, and a value of 1 indicates that the individual has more than one job).

Certain variables might initially appear to be the same because their descriptions are very similar. These variables are different in that they were asked of different groups of survey respondents. For example, the variables PEERNH1O and PEERNH2 both have the same question text of “Excluding overtime pay, tips, and commissions, what is your hourly rate of pay on your main job?” The difference between these two variables has to do with which group of respondents was asked each question, and this can be determined by looking at the edited universe. PEERNH1O was asked of respondents with PEERNPER = 1, or those who said it was easiest to report their earnings hourly. PEERNH2, on the other hand, was asked of respondents who said it was easiest to report their earnings some other way than hourly even though they were paid hourly.

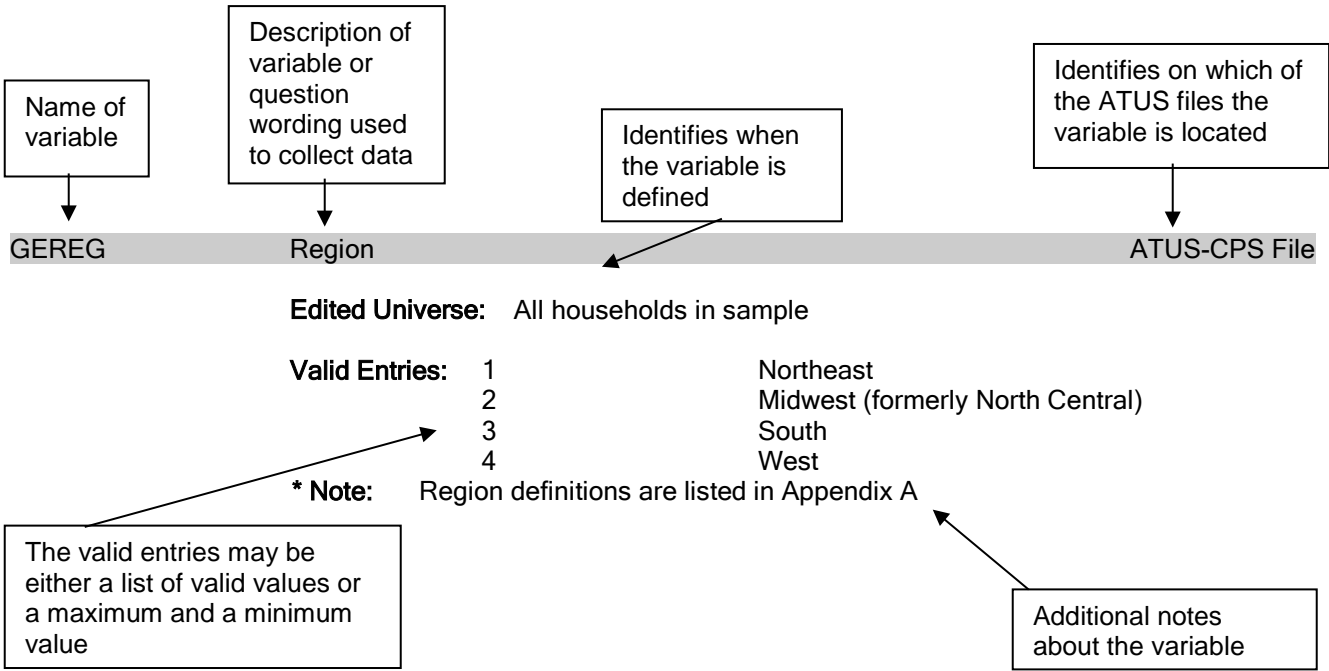

CPS Design and Methodology

More information on CPS design and methodology can be found in CPS Technical Paper 66 at www.census.gov/prod/2006pubs/tp-66.pdf.

Organization of the Data Dictionary

Variables are listed in the data dictionary in alphabetical order.

Below is a sample entry from the ATUS-CPS data dictionary:

Frequently Used Variables

The ATUS files have many variables and users may sometimes have difficulty determining which ones to use. A list of the most commonly used ATUS variables is available at www.bls.gov/tus/freqvariables.pdf.

Linking ATUS Files to the Final CPS Interview

The ATUS files can also be linked to the CPS files using information on the ATUS-CPS file. Cases on the ATUS-CPS file can be linked to their final CPS interview. The table below provides the CPS files that link to each single-year ATUS-CPS file. More detailed information about linking ATUS files to CPS files is available in Appendix K of the ATUS User's Guide (www.bls.gov/tus/atususersguide.pdf).

ATUS-CPS File	CPS File
2003 ATUS-CPS File	August 2002 – October 2003 CPS Files
2004 ATUS-CPS File	August 2003 – October 2004 CPS Files
2005 ATUS-CPS File	August 2004 – October 2005 CPS Files
2006 ATUS-CPS File	August 2005 – October 2006 CPS Files
2007 ATUS-CPS File	August 2006 – October 2007 CPS Files
2008 ATUS-CPS File	August 2007 – October 2008 CPS Files
2009 ATUS-CPS File	August 2008 – October 2009 CPS Files
2010 ATUS-CPS File	August 2009 – October 2010 CPS Files
2011 ATUS-CPS File	August 2010 – October 2011 CPS Files
2012 ATUS-CPS File	August 2011 – October 2012 CPS Files
2013 ATUS-CPS File	August 2012 – October 2013 CPS Files
2014 ATUS-CPS File	August 2013 – October 2014 CPS Files
2015 ATUS-CPS File	August 2014 – October 2015 CPS Files
2016 ATUS-CPS File	August 2015 – October 2016 CPS Files
2017 ATUS-CPS File	August 2016 – October 2017 CPS Files
2018 ATUS-CPS File	August 2017 – October 2018 CPS Files

CPS files can be downloaded from the CPS Web site at thedataweb.rm.census.gov/ftp/cps_ftp.html. CPS variable information found in this document is based on the CPS microdata files found on this Web site. It is important to note that CPS data from other sources can have different names, different formats, or different default values for the same variables.

Changes between ATUS 2003 to 2018 Data Files

Those using the multi-year files should be aware of changes to ATUS survey methods between years—such as new, discontinued, and changed variables—as well as differences in activity codes between years. For a list of these changes, see the document describing ATUS changes (www.bls.gov/tus/changes.pdf). Note that the multi-year files have their own Activity Coding Lexicon (www.bls.gov/tus/lexiconnoex0318.pdf) that differs somewhat from the single-year lexicons. The multi-year Activity Coding lexicon accounts for the differences in activity codes between years.

Metropolitan Statistical Area and County Codes (GTCBSA and GTCO)

In May 2004, the CPS introduced two new variables (GTCBSA and GTCO) identifying metropolitan statistical areas and counties¹. These were introduced as the CPS updated its geographic variables to reflect the 2000 Census and the Office of Management and Budget (OMB) June 30, 2003 definitions. The codes for these variables were phased in from May 2004 – July 2005. Some values may reflect the new CBSA definitions while others may replicate old MSA definitions (using the June 30, 1993 definitions) for the 2000-based metropolitan definition phase-in. Starting in August 2005, all codes on the CPS files reflected the new 2003 OMB definitions².

In May 2014, CPS starting making changes that impact the definitions of GTCBSA and GTCO and affect CPS estimates for smaller areas and counties³. First, they began updating codes to reflect the February 28, 2013 OMB definitions that correspond to the 2010 Census. Second, CPS began phasing-in a new sample based on the results of the 2010 Census. This means care should be taken when tallying smaller areas during this time frame of May 2014-July 2015. Some smaller areas were phased-in or phased-out during this time frame and CPS estimates may fluctuate and not be as accurate as they will be prior to May 2014 or after July 2015. Starting in August 2015, all values for GTCBSA and GTCO on the CPS files reflect the 2013 OMB definitions⁴.

Researchers should be careful using the GTCBSA and GTCO codes, as the values may correspond to different geographic areas, depending on the month and year of the CPS interview. The variables HRYEAR4 and HRMONTH on the ATUS-CPS file identify the year and month the CPS interview was conducted.

Nativity Country Codes (PEFNTVTY, PEMNTVTY, and PENATVTY)

The values for some, but not all, of the nativity country codes changed between December 2006 CPS and January 2007 CPS, or between April 2012 CPS and May 2012 CPS. In 2007, codes were changed to be more consistent with nativity codes used in the American Community Survey. Beginning May 2012, nativity codes were changed to update and include more countries. There were no changes in nativity codes from January 2002 CPS to December 2006 CPS, and no changes in codes from January 2007 CPS to April 2012 CPS. Researchers should be careful when using these nativity codes in the ATUS-CPS file, as the values may correspond to different countries depending on the year and month the CPS interview was conducted. The variables HRYEAR4 and HRMONTH identify the year and month of the last CPS interview in the ATUS-CPS file. For a detailed list of changes to the nativity country codes that occurred between December 2006, January 2007, and May 2012, please contact ATUS staff at ATUSinfo@bls.gov

Immigrant's year of entry into the U.S. (PRINUYER)

Because new values are introduced to the CPS every two years, the definitions for the values will change until a new value is introduced. This table maps the valid values for PRINUYER to the year of entry into the U.S., given the year in which the CPS interview was conducted.

As an example, if a case has [PRINUYER=20] on the ATUS-CPS file, it is necessary to determine when the CPS interview was conducted (indicated by HRYEAR4 on the ATUS-CPS file). If [HRYEAR4 = 2008] then a value of 20 corresponds to the year of entry being 2006-2008. If [HRYEAR4 = 2009] then a value of 20 corresponds to the year of entry being 2006-2009. If [HRYEAR4 ≥ 2010] then a value of 20 corresponds to the year of entry being 2006-2007.

APPENDIX B

CPS industry codes use the U.S. Census Bureau's Industry Classification System, which is based on the North American Industry Classification System. Beginning with the 2014 CPS, industry data were classified using the 2012 Census Industry Classification System. This system replaced the 2007 Census Industry Classification System. The 2007 Census Industry Classification System was incorporated beginning in the 2009 CPS; it replaced the 2002 Census Industry Classification System, which was used by CPS from 2003 until the 2007 classification scheme was implemented. There were only minor differences between the 2002, 2007, and 2012 Census Industry Classification Systems. For more information, please see www.bls.gov/cps/cpsoccind.htm.

CPS industry codes use the U.S. Census Bureau's Industry Classification System, which is based on the North American Industry Classification System. Beginning with the 2014 CPS, industry data were classified using the 2012 Census Industry Classification System. This system replaced the 2007 Census Industry Classification System. The 2007 Census Industry Classification System was incorporated beginning in the 2009 CPS; it replaced the 2002 Census Industry Classification System, which was used by CPS from 2003 until the 2007 classification scheme was implemented. There were only minor differences between the 2002, 2007, and 2012 Census Industry Classification Systems. For more information, please see www.bls.gov/cps/cpsoccind.htm.

Beginning in the January 2011 CPS, occupation data were classified using the 2010 Census Occupation Classification system. This system replaced the 2002 Census Occupation Classification system, which was used in the 2002-10 CPS. On the 2003-18 ATUS-CPS file, cases with [HRYEAR4 > 2010] will have occupation data generated using the 2010 Census Occupation Classification system. Cases on the 2003-18 ATUS-CPS file with [HRYEAR4 ≤ 2010] will have occupation data generated using the 2002 Census Occupation Classification system. The 2011 occupation data are not strictly comparable to previous years. For more information, please see www.bls.gov/cps/cpsoccind.htm.

Appendix C

Variables on the single-year ATUS-CPS files that do not appear on the 2003-18 ATUS-CPS file

The 2003-18 ATUS-CPS file includes most, but not all, of the variables available on the single-year ATUS-CPS data files. Appendix C provides a list of variables that do not appear on the 2003-18 ATUS-CPS file. It also indicates where you can find variables not included on the 2003-18 ATUS-CPS data file. For more information on the variables listed below, please see the single-year data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Table C

Variables not appearing on the 2003-18 ATUS-CPS file, but appearing on single-year ATUS-CPS files

Variable name	Description of variable	Variable is available on these files
HURHHSCRN	Is there anyone living or staying here who had to evacuate, even temporarily, where he or she was living in August because of Hurricane Katrina?	On 2005, 2006, and 2007 ATUS-CPS single-year files
HUTYPB	Type B non-interview categories	On 2003-2018 ATUS-CPS single-year files
HUTYPC	Type C non-interview categories	On 2003-2018 ATUS-CPS single-year files
HUTYPEA	Type A non-interview categories	On 2003-2018 ATUS-CPS single-year files
HWHHWGT	Household weight	On 2003-2005 ATUS-CPS single-year files
HXHOUSUT	HEHOUSUT: allocation flag	On 2003-2018 ATUS-CPS single-year files
HXPHONEO	HEPHONEO: allocation flag	On 2003-2018 ATUS-CPS single-year files
HXTELA VL	HETELAVL: allocation flag	On 2003-2018 ATUS-CPS single-year files
HXTELHHD	HETELHHD: allocation flag	On 2003-2018 ATUS-CPS single-year files
HXTENURE	HETENURE: allocation flag	On 2003-2018 ATUS-CPS single-year files
OCCURNUM	Unique person identifier	On 2003-2018 ATUS-CPS single-year files
PRCITFLG	PRCITSHP: allocation flag	On 2003-2018 ATUS-CPS single-year files
PROLDRRP	Recode from new to old RRP codes	
PRTFAGE	Topcode for age (PRTAGE)	On 2003-2018 ATUS-CPS single-year files
PUBUSCK1	Business check item 1: filter for questions on unpaid work	On 2003-2018 ATUS-CPS single-year files
PUBUSCK2	Business check item 2: skips owners of family business who did not work last week	On 2003-2018 ATUS-CPS single-year files
PUBUSCK3	Business check item 3: filter for disabled	On 2003-2018 ATUS-CPS single-year files
PUBUSCK4	Business check item 4: filter for retired	On 2003-2018 ATUS-CPS single-year files
PUCHINHH	Change in household composition	On 2003-2018 ATUS-CPS single-year files
PUDWCK1	Discouraged worker check item 1: filter for discouraged worker	On 2003-2018 ATUS-CPS single-year files

Variables not appearing on the 2003-18 ATUS-CPS file, but appearing on single-year ATUS-CPS files

Variable name	Description of variable	Variable is available on these files
PUDWCK2	Discouraged worker check item 2: filter for disabled	On 2003-2018 ATUS-CPS single-year files
PUDWCK3	Discouraged worker check item 3: filter for retired	On 2003-2018 ATUS-CPS single-year files
PUDWCK4	Discouraged worker check item 4: filter for passive job seekers	On 2003-2018 ATUS-CPS single-year files
PUDWCK5	Discouraged worker check item 5: filter for passive job seekers	On 2003-2018 ATUS-CPS single-year files
PUERN2	Weekly overtime earnings	On 2003-2018 ATUS-CPS single-year files
PUERNH1C	What is your hourly rate of pay on this job, excluding overtime pay, tips, or commissions?	On 2003-2018 ATUS-CPS single-year files
PUHRCK1	Hours respondent check item 1: labor force - remove groups from actual hours series	On 2003-2018 ATUS-CPS single-year files
PUHRCK12	Hours respondent check item 12: filter for < 15 hours to go to looking series	On 2003-2018 ATUS-CPS single-year files
PUHRCK2	Hours respondent check item 2: labor force - skips persons responding yes to PUHRFTPT out of PT series	On 2003-2018 ATUS-CPS single-year files
PUHRCK3	Hours respondent check item 3: labor force - skips persons responding yes to PUHRFTPT out of PT series	On 2003-2018 ATUS-CPS single-year files
PUHRCK4	Hours respondent check item 4: labor force - skips persons	On 2003-2018 ATUS-CPS single-year files
PUHRCK5	Hours respondent check item 5: labor force – filter for multiple jobholders for second job hours	On 2003-2018 ATUS-CPS single-year files
PUHRCK6	Hours respondent check item 6: labor force - filter for actual job hours, jobs 1 and 2	On 2003-2018 ATUS-CPS single-year files
PUHRCK7	Hours respondent check item 7: labor force - filter for hours worked paths	On 2003-2018 ATUS-CPS single-year files
PUIO1MFG	Is this business or organization mainly manufacturing, retail trade, wholesale trade, or something else? (main job)	On 2003-2018 ATUS-CPS single-year files
PUIO2MFG	Is this business or organization mainly manufacturing, retail trade, wholesale trade, or something else? (second job)	On 2003-2018 ATUS-CPS single-year files

TXNEWRACE	Flag indicating whether PTDTRACE is imputed	On 2003 ATUS-CPS single-year file

Appendix D:
Variables on the CPS files that do not appear on the 2003-18 ATUS-CPS File or the single-year ATUS-CPS Files

Most of the variables available on the CPS files also are available on the ATUS-CPS files, but there are some variables that appear on the CPS files and not on the ATUS-CPS files. Some of these variables are not available on all CPS files. The table below lists the variables that are available on individual CPS files but are missing from the 2003-18 ATUS-CPS file or the single-year ATUS-CPS files. The CPS interviews were conducted two to five months prior to the ATUS interview. For this reason, the table below lists the variables that are missing from a range of CPS files, along with the ATUS-CPS data file that these CPS files can be linked to. The “X” indicates the CPS files on which the variable is available.

* Starting with the 2003-17 ATUS-CPS file, GTCBSA and GTCO appear on the multi-year file for May 2004 to present. These variables do not appear on the single-year files before 2016.

Appendix E: Variables on the CPS files that have corresponding ATUS-CPS variables

Most of the variables available on the CPS files also are available on the ATUS-CPS file, but there are some variables on the CPS files that correspond to variables with different names on the ATUS-CPS files. The table below lists these variables, as well as the single-year ATUS-CPS files on which they can be found.

Table E
Variables on the CPS files and their corresponding ATUS-CPS variables

CPS Variable	Variable Description	ATUS Variable	Description of difference between the CPS and single-year ATUS-CPS files
PEAGE	Person's age as of survey week	PRTAGE	The variable name for the person's age in the CPS files was PEAGE through April 2012. Starting in May 2012, the name for the person's age in the CPS files is PRTAGE. In the ATUS-CPS file, the name is PRTAGE for all years (2003-2018).
PTAGE	Topcode flag for age (changed to PRTFAGE in CPS starting in May 2004)	PRTFAGE	The variable name for the topcode flag for age on the CPS files was PTAGE through April 2004. Since May 2004, the name for the topcode flag on the CPS files is PRTFAGE. In the ATUS-CPS files, the name is PRTFAGE for all years (2003-2018).
PRINUSYR	Immigrant's year of entry	PRINUYER	The variable for immigrant's year of entry has different names on the CPS and ATUS-CPS files for all available years (2003-2018). The CPS variable is named PRINUSYR, while the ATUS-CPS variable is named PRINUYER for all years.
PRDTRACE	Detailed race (changed to PTDTRACE in CPS starting in August 2005)	PTDTRACE	The variable name for the detailed race in the CPS files was PRDTRACE through July 2005. Starting in August 2005, the name for detailed race in the CPS files is PTDTRACE. In the ATUS-CPS files, the name is PTDTRACE for all years (2003-2018).
